FOLDING HOOD MGB 1971-80 (WITH ZIP OUT WINDOW)

Standard vinyl hood, fitting the black painted folding hood frame used on MGBs built between 1971 and 1980. Available in black, with a choice of contrasting bindings if desired. The hood described here is true to type for 1976-80 hoods in that it includes a zip out rear window; it may however be fitted as a useful upgrade on 1971-76 cars originally fitted with non zip out window hoods.

This convenient folding hood may also be fitted to pre-1971 MGBs/MGCs originally fitted with with grey 'packaway' or grey 'Deluxe' folding hood frames, so long as the later black folding hood frame is also fitted (available from MGOC Spares). Hood types and hood frame types are not interchangeable, so frame identification is vital before placing a order (beware of repainted frames!).

All Club hoods feature padded and strengthened extra length valances for improved weathersealing and durability. The header rail is not included, but every possible fastener is factory fitted. Hoods are designed to ensure the easiest possible DIY fitment to your existing header rail and frame.

Easy to fit. Fitting a new MGB hood is not the difficult task it is often rumoured to be. Using the Club's preferred 'no-glue' method, allowing adjustment of the hood on the header rail, an MGB hood can be beautifully fitted in around 2 1/2 hours.

Basic hand tools required. Craft knife, crosshead screwdrivers, flat bladed screwdrivers, pop rivet gun, electric drill and chalk. Additionally, to fit 'Durable Dot' press-on hood fasteners, you will require a medium weight hammer and a punch and die set (available at a very reasonable price from MGOC Spares).
