

MOULDED BOOT CARPET SET MGB ROADSTER

Quite literally the ultimate boot carpet set for your MGB. The four accurately moulded, highest quality carpet sections simply slip perfectly into place, making the set a dream to fit. Simply mark and cut the fuel filler neck hole as required. The floor carpet may be left loose for removal during cleaning, while the other carpets can be easily secured in place by several different methods.

The moulded boot carpet set effects the quickest and easiest make-over for the boot area, hiding scratched and worn paintwork on the boot floor, giving the boot a luxurious air and giving you a compartment you don't mind putting your valuables and precious belongings in, without fear of getting them damaged or dirty.

Additionally, the boot carpet set significantly reduces cabin noise. A great accessory for your car, even better when used together with the matching Ultimate carpet spare wheel cover. Available in black.

Easy to fit. Floor section lays in car. Because of the perfect shaping and inherent rigidity of the mouldings, the side and bulkhead sections may be glued in place or alternatively simply held in place unobtrusively using bodysheet wiring tags in the proximity or a handful of small black self tapping screws.

Basic hand tools required. Alternatives of upholstery adhesive or screwdriver and screws required to secure side and bulkhead carpets.
