

STAINLESS SLIMLINE SYSTEMS

Stainless steel Slimline exhaust system for efficient gas flow combined with the distinctive MG exhaust tone, all with the practicality of increased ground clearance over standard systems.

Supplied as a four-part system for easy transportation and fitment, the Slimline MGB stainless exhaust comes with a mirror-finish rear box and a smaller 'bomb' resonator type centre box for increased clearance and extra sporting tone. It is available in Chrome or Rubber Bumper versions.

The Club offers the widest range of finest quality stainless steel exhaust systems and components, produced to our own exacting standards by Double S Exhausts, Britain's premier stainless exhaust manufacturer. Made from 409 Ferritic and 304 Austenitic stainless steel with mirror finish silencers, each part is made to accurate tolerances for easy DIY fitment and comes with a lifetime guarantee.

Don't forget to also order a Club MGB standard exhaust fitting kit - see recommendation below.

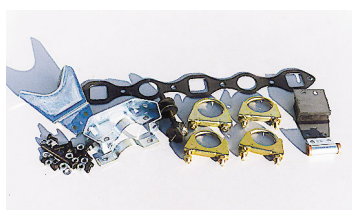

Easy to fit. Easy skills-wise, but a bit fiddly - especially the manifold to downpipe nuts. Allow plenty of time and follow the fitting instructions downloadable from this page and you won't go wrong.

[FITTING INSTRUCTIONS](#)

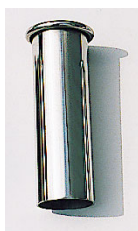

Workshop tools required. Jack (preferably a trolley jack), axle stands or ramps, wheel chocks. Penetrating oil (releasing fluid or diesel), socket set with extension bars (preferably 3/8" drive), large flat screwdriver to use as a gentle pry bar.
