PACKAWAY HOOD MGB 1962-71 (NO ZIP OUT WINDOW)

Standard vinyl hood, fitting the grey painted 'packaway' hood frame used on MGBs built between 1962 and 1971 and available in black. The hood described here is true to type for 1962-71 hoods in that it does not include a zip out rear window as standard; this feature is however available as an option and is shown later in this website section.

All Club hoods feature padded and strengthened extra length valances for improved weathersealing and durability. The header rail is not included, but every possible fastener is factory fitted. Hoods are designed to ensure the easiest possible DIY fitment to your existing header rail and frame.

Hoods with grey 'packaway' or optional grey 'Deluxe' folding hood frames were fitted to MGBs up to chassis number 219000 (the latter also fitted to MGCs). From then on, hoods on a black folding frame were fitted. Hoods made for the various hood frames are not interchangeable, so identification of your hood frame is vital before placing a hood order (and beware of repainted frames!).

Easy to fit. Fitting a new MGB hood is not the difficult task it is often rumoured to be. Using the Club's preferred 'no-glue' method, allowing adjustment of the hood on the header rail, an MGB hood can be beautifully fitted in around 2 1/2 hours.

FITTING INSTRUCTIONS

Basic hand tools required. Craft knife, crosshead screwdrivers, flat bladed screwdrivers, pop rivet gun, electric drill and chalk. Additionally, to fit 'Durable Dot' press-on hood fasteners, you will require a medium weight hammer and a punch and die set (available at a very reasonable price from MGOC Spares).
