

WALNUT DASH MGB, MGC & V8

Wood veneer is one of the materials (the other being leather) most closely associated with traditional British motoring craftsmanship - that 'wood and leather' cabin ambience that's the envy of other motor manufacturers across the world. A Club walnut dash is the start of the journey to lift your MG's cabin to that famous ambience; a journey that could also take in a walnut console (or console panels), door cappings, gear knob, door pulls or steering wheel along the way, if you wish.

Each complete burr walnut dash is manufactured from hand selected veneer to ensure consistent burr pattern throughout. A deep protective lacquer reflects the beauty of the veneer. The walnut dash simply lays over the existing dash panel and is secured with the provided antique finish screws through pre-drilled mounting holes.

Available for all MGB and MGC models, both right and left hand drive, except 1968-76 'pillow dash' USA models.

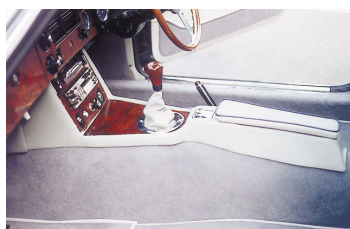

Easy to fit. Dash secured with the screws provided through pre-drilled mounting holes. Holes require drilling in the original dash panel. Disconnection and reconnection of dash features such as instruments may be required.

Basic hand tools required. The usual set of crosshead screwdrivers, plus a drill for the screw holes in the original dash.
