

WALNUT CONSOLE PANEL MGB 1971-80

Give the centre console in your 1971-80 MGB a real lift with this burr walnut radio and switch panel. Crafted to fit perfectly in the console, the burr walnut panel is manufactured from hand selected veneer and finished with a deep protective lacquer to reflect the beauty of the veneer.

The radio and switch panel, along with a matching but separately available burr walnut gear lever surround panel (see recommendation below) fit original moulded plastic consoles but are also available ready-fitted in the Club's own design of one-piece leather trimmed console, as depicted here. Now that's an idea - why not take a look at the range of Club leather trimmed consoles, to complete that 'wood and leather' effect?

The burr walnut radio and switch panel, available in 1971-76 and 1976-80 versions, is a perfect accompaniment to the Club burr walnut dash, door cappings and door pulls - also looks great with a Club Classic leather panel kit or a full leather interior upgrade.

Easy to fit. The walnut panel simply lays over the console and is secured with the screws provided through pre-drilled mounting holes. Corresponding small holes will require drilling in the original console. No disconnection and reconnection of switches etc. is required.

Basic hand tools required. The usual set of crosshead screwdrivers, plus a fine drill for the screw holes in the console.
