

VINYL SEAT COVERS MGA (PAIR)

MGOC Spares offer a range of quality, budget-priced MGA vinyl seat covers, to original Roadster or Coupe patterns, manufactured with the finest attention paid to the original features and supplied ready to fit your MGA seats.

Vinyl seat covers give your MGA interior all the appearance of the original leather items with the practicality of being easy to clean and maintain. To achieve the best, factory-fresh finish, MGA seat covers should be fitted in conjunction with new foams, seat bases and squab backboards. It has to be said that MGA seats are not the easiest to reupholster to a good finish and a lot of patience and care has to be lavished on them to get them right.

Available in a standard range of black or red for Roadster seats or black only for Coupe seats.

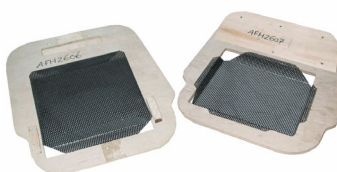

Moderate skills required. Fitting Roadster or Coupe covers is achievable by average skilled enthusiasts, though trimming experience would be advantageous to correctly plump out corners and other areas with extra wadding on these old style, traditionally upholstered seats.

Basic hand tools required. Roadster and Coupe covers secure to the wooden seat base (cushion) and the wooden trim strip at the base of the seat back (squab) with a staple gun, the foams being glued in place first. A tack hammer is useful to drive staples home when required. A pair of upholstery pliers really help in gently pulling material taut over the foam and frame before stapling.
