SEAT FOAM BASE MGA (NOT DELUXE)

Standard MGA Roadster and Coupe seats (i.e. not Deluxe) utilise the same seat foam base, despite the differences in seat appearance suggesting otherwise.

The MGA seat foam base supplied is a very good representation of the original foam used by MG and is a perfect partner for the wooden seat base assembly, also offered by the Club.

An absolute must when reupholstering seats with new Club covers - tired, sagging old seat foams would simply not do them justice and would fail to offer the correct support for the seats' occupants. Additionally, new foams match the profile of new seat covers, helping to hold them smartly taut and making the job of seat reupholstery that much easier.

Moderate skills required. Reupholstering Roadster or Coupe seats *is* achievable by average skilled enthusiasts, though trimming experience would be advantageous to correctly plump out corners and other areas with extra wadding on these old style, traditionally upholstered seats. If you are concerned, remember that the Club supplies new or exchange reupholstered MGA seat assemblies.

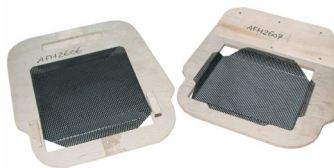

Basic hand tools required. Roadster and Coupe seat base covers secure to the wooden seat base with a staple gun, the foam being glued in place first.
