

DUNLOP STYLE DUMMY SPINNER SETS

Create the authentic appearance of centre lock wheels on your bolt-on wheel type MG with the superb and eyecatching D Style or M Style wheels. The set consists of four non-functional 42mm spinners (choose between octagonal, two eared or three eared) and four threaded spinner mounting plates.

Four and five stud bolt-on mounting plates are available, matching the D Style and M Style wheel options, to cater for all bolt-on wheel type MGA, MGB and MGC models. Using sleeve bolts to secure the spinner mounting plates maintains completely the integrity of the wheel fixing to the car.

Easy to fit. Simply bolt the mounting plate over your choice of D or M Style wheel and secure using sleeve bolts. The spinner then fixes directly onto the mounting plate.

Basic hand tools required. Once the tyres are fitted to the wheels, only the standard car tool kit is required to fit both the wheels and the spinners and mounting plates to the car.
