

## 14" TYRE TRIM SET WHITE WALL OR WHITE BAND

A real period accessory for your MG, with a capital 'P'. Available in 14" tyre size to suit MGBs and MGB GTs, tyre trim sets will transport your car straight back to the Sixties. Alternatives include white walls for the earlier Swinging Sixties or white bands for that slightly later 'Summer of Love' appearance... the choice is yours (depends which you remember really - if you remember the Sixties at all!).

The great thing is, with the MGB being a truly 1960s design, white wall and white band tyre trims look just perfect, as though they were always meant to be there. Simply fit them between the tyre and wheel rim before the tyre is inflated. Note that the trim does not interfere with the sealing bead between the tyre and wheel.

White wall and white band tyre trims are not however recommended for use on tyres lower than 70 profile.

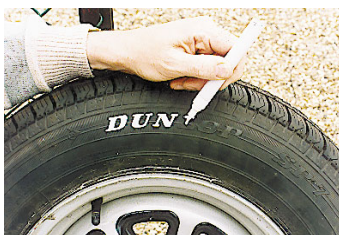

*Easy to fit.* Well, easy for your local tyre fitter to fit. The tyres must be deflated and the trims fitted before reinflation, a job best and most easily done with commercial equipment by a professional tyre fitter in a workshop. Alternatively, get them fitted when you buy new tyres.

*Special tools required.* See Fitting comments above.
